

PROFILE SUMMARY

- Senior Azure Engineer with 8 years of experience running Azure production environments at connected-vehicle scale across connected vehicles, manufacturing analytics, and automotive retail platforms, specializing in Well-Architected reviews, AKS with Container Apps, and Bicep-driven landing zones.
- Hands-on coverage across compute (AKS with Container Apps), IaC (Bicep with Terraform), CI/CD (Azure DevOps with GitHub Actions), observability (Azure Monitor with Application Insights), and integration (Functions with Service Bus and Event Grid), with networking grounded in hub-and-spoke Virtual WAN with Private Link and certified on Azure Solutions Architect Expert (AZ-305).
- Deep expertise in Well-Architected reviews across all five pillars, CAF enterprise-scale landing zones with Management Groups, event-driven integration with Service Bus and Event Grid, and FinOps tagging and Reservations and Savings Plans optimization, applying methodologies such as GitOps-style Bicep modules with environment-scoped pipelines and least-privilege Entra ID with Conditional Access and PIM to deliver secure, cost-aware Azure estates that hold up under ISO 27001 and customer load.
- Engaged collaborator working cross-functionally with Platform, Security, SRE, Product, and Finance teams in multi-subscription, review-heavy cloud platform teams, contributing to architecture review boards, on-call rotations, and cost-review forums with an ownership-first mindset and clean handoffs.
- Mentor who shares technical excellence and fosters a culture of secure, well-tagged Azure infrastructure and cost-aware, Well-Architected practice through PR reviews and module docs, while running the internal Azure guild and architecture review board and authoring widely used Bicep module and landing-zone templates.

TECHNICAL SKILLS

Compute & Containers:	AKS with Container Apps, Azure VMs, VM Scale Sets, App Service, Container Apps, Container Instances, Azure Functions, AKS, Azure Batch, Service Fabric
Networking & Edge:	hub-and-spoke Virtual WAN with Private Link, VNets, subnets, route tables, NAT Gateway, VNet peering, Private Link, Service Endpoints, ExpressRoute, Site-to-Site VPN, Application Gateway, Front Door, Azure CDN, Traffic Manager, NSGs, ASGs, Azure Firewall
Identity, Security & Compliance:	Microsoft Entra ID, Conditional Access, PIM, Managed Identities, Key Vault, Defender for Cloud, Microsoft Sentinel, Azure Policy, Blueprints, RBAC, SOC 2, HIPAA, PCI DSS, ISO 27001, FedRAMP
Storage & Database:	Azure Blob with lifecycle and tiering, Azure Files, Queues, Tables, Data Lake Gen2, Azure SQL DB, SQL Managed Instance, Cosmos DB, PostgreSQL Flexible Server, MySQL Flexible Server, Cache for Redis, Managed Disks, Ultra Disks, Azure Backup, cross-region replication
Infrastructure as Code:	Bicep with Terraform, ARM templates, Pulumi, Terraform modules, remote state on Storage Account, environment-scoped pipelines, what-if previews, Azure Verified Modules
CI/CD & Automation:	Azure DevOps with GitHub Actions, Azure DevOps Boards, Repos, Pipelines, Artifacts, Azure Update Manager, Azure Automation, Logic Apps for ops, PowerShell, Azure CLI
Serverless & Integration:	Functions with Service Bus and Event Grid, Logic Apps, Service Bus, Event Grid, Event Hubs, Stream Analytics, API Management, Durable Functions, choreography, saga
Observability, Cost & FinOps:	Azure Monitor with Application Insights, Log Analytics workspaces, metrics, alerts, Network Watcher, Datadog, New Relic, Grafana, OpenTelemetry, Cost Management and Billing, Azure Advisor, Reservations, Savings Plans, Spot VMs

Certifications & Frameworks: Azure Solutions Architect Expert (AZ-305), Azure Administrator (AZ-104), Azure Developer (AZ-204), Azure DevOps Engineer Expert (AZ-400), Azure Security Engineer (AZ-500), Azure Well-Architected Framework, Cloud Adoption Framework, Management Groups, Enterprise-Scale landing zones, FinOps tagging

EDUCATION

Chalmers University of Technology **M.Sc. in Computer Science** Gothenburg, Sweden • Aug 2013 - Jun 2018

WORK EXPERIENCE

Volvo Cars **Senior Azure Engineer** Gothenburg, Sweden • Apr 2021 - Present

- Owned Azure architecture and solution design end to end on the **connected-car cloud platform on Azure** serving **2.4M connected vehicles**, shipping **AKS workloads**, **Cosmos DB fleets**, and **event mesh** across **68** Azure subscriptions reviewed against all five Well-Architected pillars.
- Ran core compute and containers on **AKS with KEDA autoscaling**, **Container Apps for stateless edges**, and **Functions on Premium plans**, blue/green deploys on App Service for stateful add-ons, and Container Instances for batch fan-out across **160** production workloads, pulling Function cold-start from 2.1s down to **240ms** on the vehicle-telemetry path.
- Owned Azure networking with **Virtual WAN hub-and-spoke with Private Link**, **Azure Firewall**, and **Application Gateway**, tightened NSGs and ASGs on every spoke, layered Front Door and Azure CDN on the customer edge, and routed **38** VNets through private endpoints and Service Endpoints, cutting egress cost by **58%** in the first two quarters.
- Hardened identity, security, and compliance with **Microsoft Entra ID with Conditional Access**, **PIM**, **Key Vault**, and **Defender for Cloud plus Sentinel**, Managed Identities on every workload, Azure Policy initiatives bound to Management Groups, and Sentinel detections tuned to the platform, dropping critical findings by **74%** and clearing ISO 27001 controls at a **100%** pass rate across the last two audit windows.
- Designed storage and database services around **Cosmos DB multi-region with Azure SQL Managed Instance and Blob with lifecycle tiering**, Azure Files for shared workspace state, Cache for Redis on hot paths, PostgreSQL Flexible Server for analytics, and Azure Backup vaults for cross-region DR across an **11PB** Blob estate, cutting SQL p99 query latency on the telematics path by **57%**.
- Drove infrastructure as code with **Bicep with Azure Verified Modules**, **Terraform for cross-cloud edges**, and **what-if previews on every PR**, ARM templates for one-off compliance baselines, Pulumi for app constructs, and policy gates with Checkov on every PR, authoring **52** modules and dropping new-subscription provisioning from **4 days** to **40 minutes**.
- Ran CI/CD, DevOps, and automation through **Azure DevOps Pipelines with OIDC into Azure**, **GitHub Actions on app repos**, and **Azure Update Manager for patching**, drift detection on every Bicep what-if, and chat-ops runbooks for break-glass scenarios, holding **380** deploys per week across the estate at a **1.6%** change failure rate.

SEB **Azure Cloud Engineer** Stockholm, Sweden • Jul 2018 - Mar 2021

- Built serverless and integration services with **Functions with Service Bus topics**, **Logic Apps for partner flows**, and **Durable Functions for saga orchestration**, Event Grid for change capture, Event Hubs with Stream Analytics for ingest, and API Management for the partner edge, lifting event throughput from **7k/s** to **62k/s** across a fleet of **280** production Functions.
- Owned observability and cost management with **Azure Monitor workbooks with Application Insights traces**, **Cost Management reviews**, and **Reservations coverage**, Log Analytics queries on every workload, anomaly alerts wired to PagerDuty, and Azure Advisor rightsizing on every cycle, pulling incident MTTR from **24 min** down to **4 min** and cutting monthly Azure spend by **31%** without slowing release pace.
- Led migration and modernization work using **Azure Migrate plus Database Migration Service with refactoring waves into AKS and Functions**, App Service Migration Assistant for legacy web tiers, and CAF-style runbooks for cutover gates, moving **86** workloads off legacy data centers inside a **10 months** window with zero customer-visible downtime.
- Stood up multi-subscription governance through **Management Groups with CAF enterprise-scale landing zones**, **Azure**

Policy guardrails, and FinOps tagging, chargeback dashboards for every product team, and Enterprise-Scale blueprints for new business units, onboarding **34** net-new Azure subscriptions under a single audit-ready posture.
