

Engineer

PROFILE SUMMARY

- **Cloud Security Engineer** with 10 years of experience securing **multi-cloud fintech estates** across **fintech, payments, and consumer financial services**, specializing in **cloud security architecture, IAM hardening, and CSPM at scale**.
- Solid technical background across clouds (**AWS, GCP**), **CSPM (Wiz, Prisma Cloud)**, **IaC security (Terraform, Checkov)**, **detection (GuardDuty, CloudTrail)**, **container orchestration on EKS**, and **secrets management with HashiCorp Vault**, with strong fundamentals in **least-privilege IAM, policy-as-code discipline, and continuous CSPM-driven remediation**.
- Deep expertise in **multi-cloud security architecture, cloud IAM and federation hardening, CSPM and continuous-drift detection, and cloud-native threat detection and response**, applying practices such as the **AWS Well-Architected Security Pillar** and **CIS Benchmarks and NIST CSF alignment** to deliver **secure, well-governed, and audit-ready cloud estates**.
- Engaged collaborator working **cross-functionally** with **Platform Engineering, SRE, and Application Security** leadership in **DevSecOps-first engineering organizations**, contributing to change-advisory boards, blameless post-incident reviews, and shift-left security forums with a pragmatic, ownership-first mindset.
- Senior practitioner who shares technical excellence and fosters a culture of **policy-as-code discipline** and **ticket-free remediation** through guardrail authorship and design coaching, while running **cloud security guild** sessions and authoring widely adopted Terraform-module security baselines.

TECHNICAL SKILLS

Cloud Architecture & Frameworks:	AWS, Azure, GCP, AWS Well-Architected Security Pillar, CIS Benchmarks, NIST CSF, Cloud Adoption Framework, landing zones
IAM & Identity:	AWS IAM, Entra ID, GCP IAM, Okta, federation, SCPs / OUs, Conditional Access, JIT access, role boundaries
CSPM / CNAPP:	Wiz, Prisma Cloud, Orca, Lacework, AWS Security Hub, Microsoft Defender for Cloud, GCP Security Command Center
Workload & Container:	EKS, AKS, GKE, ECS, Lambda, Cloud Functions, Falco, OPA Gatekeeper, Kyverno, image scanning (Trivy, Snyk)
Cloud Network Security:	VPCs / VNETs, security groups, NSGs, private endpoints, transit gateways, AWS WAF, Shield, Front Door, Zero Trust
Data Protection & Encryption:	AWS KMS, Azure Key Vault, GCP KMS, CMKs, HSMs, envelope encryption, Macie, Purview, GCP DLP, secrets management
IaC Security & Policy-as-Code:	Terraform, CloudFormation, Bicep, Pulumi, Checkov, tfsec, KICS, Terrascan, OPA / Rego, Sentinel
Compliance & Audit:	SOC 2, ISO 27001, PCI DSS, HIPAA, FedRAMP, CIS, control mapping, tagging strategy, audit evidence pipelines

EDUCATION

University of California, Berkeley	B.S. in Electrical Engineering & Computer Sciences	Berkeley, CA • Sep 2011 - May 2015
------------------------------------	---	------------------------------------

WORK EXPERIENCE

Block, Inc.	Senior Cloud Security Engineer	San Francisco, CA • Sep 2019 - Present
-------------	---------------------------------------	--

- Own the cloud security architecture for Block's **multi-cloud** fintech estate across **120+** accounts and projects, coordinating **landing-zone design**, **IAM guardrails**, and **CSPM and drift detection** across **180** engineers in **14** product teams.
- Hardened cloud IAM through **least-privilege** policy refactors, federated SSO with **Conditional Access**, and just-in-time access, retiring **42** over-privileged roles and clearing IAM Access Analyzer to **zero** high-risk findings in **6 months**.
- Operate the CSPM platform on **Wiz** across **120** accounts, cutting open high-severity findings from **640** to **38** over **14 months** through prioritized fix campaigns and **policy-as-code** guardrails.
- Run the container security program across **38** EKS clusters with **Falco** runtime detection and **OPA Gatekeeper** admission policies, sustaining **96%** image scan coverage and **zero** unsigned-image deploys to production.
- Designed the **Zero Trust** cloud network across **48** VPCs, with transit-gateway **hub-and-spoke** topology, private endpoints by default, and **AWS WAF** plus **Shield** on tier-1 public surfaces, eliminating all **14** internet-facing legacy paths during the migration.
- Manage data protection on **AWS KMS** with customer-managed CMKs, S3 bucket encryption and access policies across **12,000+** buckets, and **Macie**-driven sensitive-data discovery, retiring **4** legacy key stores.
- Built the cloud detection pipeline on **GuardDuty**, **CloudTrail**, and the **Chronicle** SIEM, owning **~80** cloud incidents per quarter and cutting MTTR on cloud-specific findings (credential abuse, S3 exposure, privilege escalation) from **6 hours** to **42 minutes**.

PagerDuty **Cloud Security Engineer**

San Francisco, CA • Jul 2015 - Aug 2019

- Owned the IaC security program scanning **Terraform** modules with **Checkov** and **tfsec** in CI, blocking **1,400+** policy violations before merge over **30 months** and standardizing the org's Terraform module library.
- Built **Lambda**-driven auto-remediation for the **top-10** misconfigurations (public S3, unencrypted EBS, overly permissive security groups), automating cleanup of **2,300+** findings per quarter across **8** AWS accounts.
- Mentored **6** mid-career engineers through cloud security certifications (**CCSP**, **AWS Security Specialty**), and authored the team's onboarding runbook adopted by **3** sister units.
- Partnered with **Platform Engineering**, **SRE**, and **Compliance** teams across **5** product surfaces, authoring **22** cloud security runbooks and onboarding **4** new cloud security engineers into the team's change-management workflow.
