

PROFILE SUMMARY

- Senior BI Developer with 7 years of experience delivering enterprise BI environments across outdoor retail co-op, premium home goods, and SaaS commerce, specializing in Power BI dashboard development, Snowflake dimensional modeling, and self-service BI governance.
- Solid technical background across BI platforms (Power BI, Tableau), data warehouses (Snowflake), ETL/ELT pipelines (dbt, Fivetran), semantic layers (DAX), and languages (SQL, Python) with strong fundamentals in dimensional modeling, governed semantic layers, and accessible visualization design.
- Deep expertise in star-schema dimensional modeling, single source of metric truth, dashboard performance tuning, and governed self-service analytics, leveraging methodologies such as Kimball-style dimensional design and data-product certification workflows to drive trusted, fast, and self-service-ready business intelligence.
- Engaged collaborator working cross-functionally with Finance, Merchandising, Marketing, and Data Engineering teams in data-product-as-service environments, contributing to requirements workshops, metric-review boards, and post-launch dashboard retrospectives with a stakeholder-first, ownership-first mindset.
- Emerging leader who shares technical excellence and fosters a culture of metric-trust obsession and documentation discipline through model reviews and BI office hours, while leading BI guild and metric-review sessions and authoring widely adopted dimensional-model and dashboard-design templates.

TECHNICAL SKILLS

BI Platforms:	Power BI (Service, Premium, Paginated Reports), Tableau, Looker, Qlik Sense, MicroStrategy, ThoughtSpot, SAP BusinessObjects
Data Warehouses & OLTP:	Snowflake, BigQuery, Redshift, Synapse, Databricks SQL Warehouse, SQL Server, Oracle, Postgres
ETL / ELT:	dbt, Azure Data Factory, SSIS, Informatica, Talend, Fivetran, Matillion, Power Query / M
Data Modeling:	Star & snowflake schemas, slowly-changing dimensions, Kimball methodology, tabular models, OLAP cubes
Semantic Layer & Metrics:	DAX, LookML, Tableau calculated fields, dbt metrics, certified-dataset governance, version-controlled metrics
Visualization & UX:	Chart-type selection, accessible color and contrast, narrative dashboard flow, mobile and tablet layouts, WCAG-aware design
Governance, Quality & Security:	Row-level security, workspace and dataset access controls, GDPR / HIPAA / SOX awareness, reconciliation tests, certified datasets
Languages & Scripting:	SQL (advanced window functions, CTEs), DAX, Python (pandas, basic ETL), M / Power Query, Bash, Git

EDUCATION

University of California, Irvine **B.S. in Information & Computer Science**

Irvine, CA • Sep 2014 - Jun 2018

WORK EXPERIENCE

REI Co-op **Senior BI Developer**

Seattle, WA • Aug 2022 - Present

- Own enterprise BI delivery for the Retail and Merchandising business supporting 2,400+ business users, leading requirements gathering and end-to-end delivery across executive merchandising scorecards, store-operations reporting, and finance and inventory analytics, delivering 180+ certified reports and dashboards.

- Designed the dimensional BI model on **Snowflake** around **star schemas** with conformed dimensions, Type 2 slowly-changing dimensions, and Power BI tabular models with calculation groups, maintaining **9** enterprise tabular models and cutting median query response from **14 seconds** to **2.6 seconds**.
- Built BI-ready data pipelines using **dbt** and **Fivetran**, with **dbt models with tested grains**, SaaS connectors, and Azure Data Factory orchestration, maintaining **140+** dbt models and delivering a **15-minute** refresh on the executive scorecard.
- Designed executive and operational dashboards in **Power BI** and **Tableau**, including **executive scorecards with drill-through**, store-ops daily flash reports, and paginated reports for store leadership, shipping **48** production dashboards with **2,400** weekly active business users.
- Authored the team's warehouse query patterns in **SQL**, including **window functions and CTEs** across fact tables, incremental aggregate tables, and clustering keys tuned for Snowflake, powering **180,000** weekly query executions across the BI fleet.
- Drove the dashboard performance program using **incremental refresh** and dataset partitioning, query folding with aggregated views, and Power BI Premium capacity tuning, cutting median dashboard load from **12 seconds** to **2.1 seconds**.
- Ran the data-quality and governance program with **dbt tests**, source-system reconciliation, row-level security on store data, and a certified-dataset workflow, achieving a **92%** reduction in finance reconciliation tickets across **4** quarters.

Williams Sonoma **BI Developer**

San Francisco, CA • Jun 2019 - Jul 2022

- Stood up the enterprise metric catalog on **DAX** with **DAX-based shared measures**, version-controlled metric definitions, and a quarterly metric-review board, curating **220** certified metrics across **8** business domains.
- Authored the team's dashboard design system with **chart-type selection guides**, WCAG-aligned color and contrast standards, and narrative flow templates for executive decks, lifting time-on-page on the merchandising dashboards from **1.2 minutes** to **3.8 minutes**.
- Built the self-service BI program with **weekly Power BI office hours**, DAX and modeling workshops, and a certified-dataset playbook, training **380** analysts and business power users and shipping **46** certified datasets.
- Worked closely with **Finance, Merchandising, Marketing, and Data Engineering** teams to coordinate quarterly metric-review boards, data-product roadmap planning, and audit-readiness reviews, authoring **11** BI standards and runbooks that shaped the team's standard playbook and mentoring **5** junior BI analysts and developers through their first dashboard launches.
