

PROFILE SUMMARY

- **Network Administrator** with 11 years of experience operating **multi-site enterprise networks** across **hospitality, healthcare, and corporate IT**, specializing in **LAN/WAN administration, firewall operations, and enterprise wireless**.
- Solid technical background across switching and routing (**Cisco, VLAN trunking, OSPF**), wireless (**Meraki, 802.1X with WPA3 Enterprise**), perimeter security (**Palo Alto**), monitoring (**SolarWinds, NetFlow with Wireshark**), and IPAM on Infoblox, with strong fundamentals in **change-management discipline, monitoring rigor, and structured OSI-layer troubleshooting**.
- Deep expertise in **multi-site LAN/WAN administration, firewall and VPN operations, enterprise wireless management, and monitoring and incident response**, applying practices such as **OSI-layer troubleshooting and ITIL change management** to deliver **reliable, secure, and well-documented networks**.
- Engaged collaborator working **cross-functionally** with **Security, Server, Helpdesk, and Site IT teams** in **ITIL-driven IT operations**, contributing to change advisory boards, post-incident reviews, and refresh planning with a pragmatic, ownership-first mindset.
- Senior operator who shares technical excellence and fosters a culture of **runbook discipline** and **post-incident review rigor** through after-action reviews and peer coaching, while leading **network operations weekly review** sessions and authoring widely adopted runbooks and SOPs.

TECHNICAL SKILLS

Routing & Switching:	Cisco Catalyst, Cisco Nexus, VLAN trunking, inter-VLAN routing, OSPF, EIGRP, BGP, spanning tree (RSTP/MST), LACP/EtherChannel, HSRP/VRRP
Firewalls & Security:	Palo Alto PAN-OS, Fortinet FortiGate, Cisco ASA, ACL design, NAT, IPsec and SSL VPN, Zero Trust patterns, 802.1X with RADIUS
Wireless:	Cisco Meraki, Aruba Central, Ruckus, RF site surveys, WPA2/3 Enterprise, 802.1X authentication, guest SSID and captive portal, channel and power tuning
WAN & SD-WAN:	MPLS, Metro Ethernet, dedicated internet access (DIA), Cisco SD-WAN (Viptela), Meraki SD-WAN, site-to-site VPN, QoS for voice and video
Monitoring & Performance:	SolarWinds NPM/NCM, PRTG, Nagios, Zabbix, LibreNMS, NetFlow / sFlow analyzers, Wireshark, SNMPv3, syslog and trap collection
DNS, DHCP & IPAM:	Infoblox, BlueCat, Microsoft DNS and DHCP, BIND, phpIPAM, subnetting, DNS zones (forward and reverse), DHCP scopes and reservations
Protocols & Troubleshooting:	TCP/IP, OSPF, BGP, EIGRP, STP, ARP, ICMP, packet capture (Wireshark, tcpdump), ping/traceroute/nslookup, OSI-layer troubleshooting
Certifications & Methodologies:	Cisco CCNA, Cisco CCNP Enterprise, CompTIA Network+, Palo Alto PCNSA, ITIL Foundation, change management, Visio / Lucidchart / draw.io documentation

EDUCATION

George Mason University **B.S. in Information Technology**

Fairfax, VA • Sep 2011 - May 2015

WORK EXPERIENCE

Hilton Worldwide **Senior Network Administrator**

McLean, VA • Aug 2019 - Present

- Own the day-to-day administration of the **corporate IT and brand-network** environment, covering **850+** Cisco and Meraki devices across **corporate HQ LAN, 40+ branch sites** over SD-WAN, and **enterprise wireless** for **9,000+** corporate users.
- Administer the LAN, WAN, and VLAN fabric across **320** access and core switches at **42** sites, running VLAN trunking, inter-

VLAN routing, spanning tree, and LACP/EtherChannel link aggregation across **180** production VLANs at **99.99%** fabric uptime.

- Run IPAM, DNS, and DHCP on **Infoblox** across **62k** IP addresses, **640** subnets, and **180** DHCP scopes, holding forward and reverse DNS resolution at **20 ms** at the branch edge.
- Manage perimeter security on **Palo Alto PAN-OS**, maintaining **1,400+** firewall rules across **18** security zones with ACLs, NAT, and **60** site-to-site IPsec tunnels, while terminating **2,200** concurrent remote-access VPN tunnels for hybrid users.
- Run the enterprise wireless fabric across **1,100** Meraki MR access points spanning **6** SSIDs and **2.4 / 5 / 6 GHz** radios, with RF tuning, guest captive portal, and 802.1X authentication supporting **14,000** peak concurrent clients at **98.4%** client connect rate.
- Operate network monitoring on **SolarWinds** across **850** polled devices, with **NetFlow** and Wireshark for deep dives, cutting MTTR on network incidents from **2 hr 40 min** to **48 min** and sustaining **99.98%** uptime on tier-1 circuits.
- Triage and resolve **1,600+** network tickets per year, including **45** P1 incidents within a **30 min** SLA, using OSI-layer troubleshooting, CLI tools (ping, traceroute, nslookup), and packet captures; hold escalations to **under 4%** and record **92%** first-touch resolution.

MGM Resorts International **Network Administrator**

Las Vegas, NV • Jun 2015 - Jul 2019

- Drove network change management and firmware patching across the property estate, processing **220+** network changes with planned maintenance windows shrinking from **6 hr** to **90 min** and **zero** failed firmware rollbacks.
- Owned network documentation in **Visio** and the team's IPAM and asset inventory, maintaining **60+** network diagrams and runbooks; cleared **PCI** and **SOX** audits in back-to-back years.
- Coordinated with **4** ISPs and **2** carriers on circuit installs, escalations, and RMAs, handling **300+** vendor and ISP tickets and closing them with **zero** billing disputes left open over 30 days.
- Worked closely with **Security, Server, Helpdesk, and Property** IT teams across **11** resort properties, authoring **35** runbooks and SOPs that shaped the team's operating baseline and onboarding **6** new-hire network administrators.
