

### PROFILE SUMMARY

- **Front-End Developer** with 5 years of experience delivering responsive, accessible, and high-performance user interfaces across **SaaS platforms** and **enterprise tools** such as **real-time analytics dashboards** and self-serve onboarding flows.
- Well-rounded technical skill set, with proficiency in front-end frameworks (**React**, **Next.js**), styling systems (**Tailwind CSS**, **Styled Components**), state and data management (**Redux**, **React Query**), testing tools (**Jest**, **Cypress**), and build tooling (**Vite**, **Webpack**).
- Deep expertise in **state architecture**, **accessibility (WCAG 2.1 AA)**, client-side performance tuning, and scalable front-end patterns, leveraging methodologies such as **Atomic Design** and **Component-Driven Development** to drive **reusability** and **maintainability**.
- Engaged collaborator working **cross-functionally** with Designers, Product Managers, and Backend Engineers in **Agile environments**, contributing to sprint planning, and UX discussions with a pragmatic, solution-oriented mindset.
- Emerging leader who shares technical excellence and fosters a culture of **code quality** and ownership through code reviews and mentorship, while leading **front-end guild sessions** and authoring widely adopted best-practice guides.

### TECHNICAL SKILLS

|                                   |                                                                                      |
|-----------------------------------|--------------------------------------------------------------------------------------|
| Languages & Scripting:            | JavaScript (ES6+), TypeScript, HTML5, CSS3                                           |
| Frameworks & Libraries:           | React, Next.js, Redux, React Query, React Hook Form, Tailwind CSS, Styled Components |
| Testing & QA:                     | Jest, React Testing Library, Cypress, Axe, Lighthouse                                |
| Performance & Optimization:       | Chrome DevTools, Lighthouse                                                          |
| Build, Tooling & Version Control: | Vite, Webpack, Babel, npm, Yarn, Git, GitHub, GitLab                                 |
| Accessibility & Standards:        | WCAG 2.1 AA, Semantic HTML, ARIA, Cross-Browser Testing                              |
| Schema & Form Handling:           | Yup (validation), WSDL (SOAP), OpenAPI (REST)                                        |

### EDUCATION

Northeastern University **B.S. in Computer Science**

Boston, MA • Sep 2019, May 2023

### WORK EXPERIENCE

HubSpot **Front-End Developer**

Cambridge, MA • Jun 2023, Present

- Translated product vision into an elegant, high-performance **form builder UI**, leading end-to-end development and solving complex challenges in component **reusability**, **accessibility**, and **scalability** within a modular **React** architecture.
- Collaborated closely with **cross-functional** stakeholders, including **UX/UI Designers**, **Product Managers**, and **Backend Engineers** to align on feature requirements, technological choices, and implementation to create compelling user experiences.
- Engineered a **reusable component** system grounded in **Atomic Design**, leveraging Storybook for UI isolation, **Tailwind CSS** and **TypeScript** for prop safety and composition, driving a **70% reuse rate** across dynamic front-end modules.
- Architected the form's state in **React** with **Context API**, **React Hook Form** and **Yup** for validation, **localStorage hydration** for persistence, and **IntersectionObserver**-driven lazy rendering, scaling to **200+** dynamic inputs while keeping render times under **200ms**.
- Owned UI testing and performance with **Jest** (unit), **Cypress** (end-to-end), and **Lighthouse** for performance regression and audits, raising test coverage to **85%** and improving **LCP** from **3.6s** to **2.1s (~42%)** through **Webpack** bundle reduction, **code-splitting**, and **lazy loading**.

- Ensured **accessibility** compliance and cross-browser parity through **Axe** audits and emulation testing, achieving **WCAG 2.1 AA** standards and reducing UI-related support tickets by streamlining **Chrome**, **Firefox**, and **Safari** behavior.
- Supported team growth by providing guidance, conducting **code reviews**, and promoting **continuous learning** resources.

## Wayfair **Front-End Developer Co-op**

Boston, MA • Jan 2022, Aug 2022

- Shipped six features end-to-end on the **product detail page** using **React** and **Redux**, pairing daily with senior engineers and contributing to A/B tests that lifted conversion by **12%**.
- Migrated legacy class components to functional **hooks** across a 120-component sub-tree, removing dead state, simplifying lifecycle handling, and reducing render time on the largest screens by **~30%**.
- Cut bundle size by **34%** through **route-level code-splitting**, dependency audits, and tree-shaking config in **Webpack**, improving Time to Interactive on slower 4G connections.
- Wrote **unit tests** with **Jest** and React Testing Library for every shipped component, raising sub-tree coverage from 41% to 78% and unblocking continuous deployment for the surface.
- Drove an **WCAG 2.1 AA** remediation pass on the surface, fixing focus traps, ARIA labelling, and color-contrast violations flagged by **Axe**.
