

PROFILE SUMMARY

- Senior Web Developer with 7 years of experience in agency and in-house web teams across e-commerce, media publishing, and SaaS marketing sites, specializing in full-stack web development, CMS work, and Core Web Vitals optimization.
- Well-rounded skill set across front-end (React, TypeScript), back-end (Node.js, Express), CMS (WordPress), styling (Tailwind CSS, Sass), and data & hosting (PostgreSQL, Vercel), with strong fundamentals in semantic HTML, accessible markup, and Core Web Vitals discipline.
- Deep expertise in component-driven UI, semantic HTML, Core Web Vitals, and lifecycle ownership, leveraging methodologies such as performance budgets and WCAG audits to drive fast, accessible, and maintainable sites across the lifecycle.
- Engaged collaborator working cross-functionally with Design, Content, SEO, Marketing, and DevOps teams in client-facing web teams, contributing to design hand-offs, content launches, and accessibility reviews with a user-first, standards-first mindset.
- Emerging leader who shares technical excellence and fosters a culture of Core Web Vitals discipline and accessibility-first delivery through code-review office hours and a11y clinics, while leading Web Developer guild sessions and authoring widely adopted component-library and a11y-pattern guides.

TECHNICAL SKILLS

Front-End Development:	HTML5, CSS3, JavaScript (ES2024), TypeScript, React, Vue, Svelte, Astro, Web APIs, jQuery (legacy)
Back-End & APIs:	Node.js, Express, Next.js API routes, PHP, Python (Django, Flask), Ruby on Rails, REST API design, sessions and auth
CMS & Website Platforms:	WordPress (themes, plugins, Gutenberg), Shopify, Drupal, Webflow, Contentful, Sanity, headless CMS integrations
HTML, CSS & Responsive Design:	Semantic HTML, Flexbox, CSS Grid, custom properties, Tailwind CSS, Sass, PostCSS, mobile-first breakpoints, design-system collaboration
Databases & Hosting:	PostgreSQL, MySQL, MariaDB, MongoDB, Firebase, Supabase, Vercel, Netlify, Cloudflare Pages, WP Engine, AWS Amplify
Performance, SEO & Accessibility:	Core Web Vitals (LCP, INP, CLS), Lighthouse, image optimization, lazy loading, schema.org structured data, sitemaps, WCAG 2.2 AA, ARIA, keyboard navigation
Certifications & Methods:	AWS Certified Cloud Practitioner, Google Mobile Web Specialist, IAAP CPACC (in progress), MDN Web Docs contributor
DevOps & Collaboration:	Git, GitHub Actions, CI/CD pipelines, DNS, SSL/TLS, CDN configuration, Figma hand-offs, client demos, technical scoping briefs

EDUCATION

Pratt InstituteB.F.A. in Communications Design (Interactive minor)

Brooklyn, NY • Sep 2014 - May 2018

WORK EXPERIENCE

SquarespaceSenior Web Developer

New York, NY • Aug 2022 - Present

- Translated product vision into the merchant template UI on Squarespace Commerce, leading end-to-end development across 2 squads of engineers and designers and shipping a reusable component library that serves 3.2M active merchant

sites.

- Built and maintained the merchant APIs in **Node.js** with **Express**, handling session auth, CSRF protection, and background job orchestration for inventory sync; shipped **38 endpoints** and cut p95 server response from **420 ms** to **180 ms**.
- Drove the responsive CSS architecture for storefront templates in **Tailwind CSS** and **Sass**, piping design tokens from Figma to CSS custom properties and using container queries and CSS Grid for template layouts; shipped **46 templates** and lifted mobile usability from **72** to **98**.
- Built dynamic merchant widgets in **TypeScript** with vanilla DOM plus **React** islands for performance-critical surfaces, form validation, animation, and Intersection Observer driven storefront feeds, shipping **22 features** across the merchant dashboard surface.
- Owned the template engine and headless-CMS integrations on top of **WordPress**, writing custom block editor extensions and theme-migration tooling with backward-compatible defaults; lifted template editor adoption from **46%** to **82%**.
- Led a Core Web Vitals optimization program covering responsive images, route-level code splitting, and CDN edge caching, cutting **LCP** from **3.4s** to **1.6s** across 3.2M merchant sites.
- Implemented schema.org structured data on product and article pages and ran **WCAG 2.2 AA** audits with **axe-core** in CI, closing **180+ findings** at a Lighthouse SEO score of **98**.

HubSpot **Web Developer**

Cambridge, MA • Jun 2019 - Jul 2022

- Owned database integration across **12 schema migrations** on 4 customer-facing services using **PostgreSQL** for product data and MongoDB for blog content, with zero-downtime expand/contract migrations and zero production data loss.
- Ran CI/CD ownership through **GitHub Actions** for build, test, and **Vercel** deploys, plus Cloudflare DNS, SSL/TLS, and CDN edge cache management, lifting deploy frequency from **weekly** to **6x daily** with zero rollback escalations across 28 sprints.
- Owned cross-browser testing and site-lifecycle maintenance using **BrowserStack** across Chrome, Safari, Firefox, Edge, iOS, and Android, with weekly Sentry triage and security patching across **WordPress** core, plugins, and Node dependencies, holding **99.97%** uptime across **18** marketing sites.
- Worked closely with **Design, Content, SEO, Marketing, and DevOps** teams to coordinate **design-system migration** across 8 marketing properties, authoring **7 web-ops playbooks** (deploy, incident, accessibility audit, theme migration) and mentoring **3 junior Web Developers** through their first site rotations.
